

GRAIN AND PRODUCE MARKET

Export Trade in Wheat Shows Increase Since Monday.

ALL GRAINS MAKE ADVANCE

Three Principal Cereals Climb to Higher Levels, with Wheat Leading, Followed by Oats and Corn.

OMAHA, Sept. 16, 1914.

The export trade in wheat is again on a large scale as shown by the takings of over 1,000,000 bushels at the sea coast since late Monday. Normal conditions are now to be seen in the movement of breadstuffs out of the Atlantic as well as a dull port and ocean freight are fitting up under new and improved conditions. Export clearances have fallen off the last two weeks, but they are expected to show an enormous total from this time forward.

The wheat market was a largely over-sold affair on Monday, and when it was seen that Liverpool refused to follow the sharp break on that day, there were many shorts, who wanted to get under cover, and they did the price up early, but on the advance the bears again attacked it and drove it down considerably below the resting spots of Monday. It was a most erratic market, with the public willingly paying for large chunks of the December future on all price set-backs. Great caution was shown by the buying side, and this led many to believe that the wheat was being taken by strong hands, and that the selling was almost wholly by those having private information.

There were many war rumors in circulation on the Board of Trade yesterday, but they were taken as mere hedges. The most important news to come to hand was the rumor in London that an important wing of the German army was forced to surrender. There were also hedging sales again increased cash wheat purchases in the country which the war news mentioned, over the entire of all else. St. Louis and Kansas City furnished bull news that was given considerable attention and consisted of reported large sales of wheat and flour for export.

Cable advices received late yesterday report storage facilities at Liverpool as inadequate. There is an almost complete statement in the demand for wheat from the continent and it is smaller from the U. S. Canada of this grain of the English coast were offered more freely and in some cases were being pressed for sale. Wheat was up to 10c higher. Corn was 1c to 1 1/2c higher. Oats were 1/2c to 3/4c higher.
